PROFESSIONAL SUMMARY

Curious and detail-oriented UI/UX enthusiast with advanced Figma and Canva skills and foundational frontend knowledge (HTML, CSS, JavaScript, React, Next.js). Strong interest in edtech and user-centered design. Participated in three hackathons and earned 1st runner-up twice. Comfortable collaborating with cross-functional teams to create user flows, wireframes, and interactive prototypes under tight deadlines.

SKILLS

Design (UI/UX): User Flows, Wireframing, Prototyping, Usability Testing, Information Architecture, Design Systems (Basic), Mobile-first Design

Tools: Figma (Advanced), Canva (Advanced), Auto Layout, Components & Variants, Google Workspace, Notion (Basic), GitHub

Frontend (Basic): HTML, CSS, JavaScript, React, Next.js

Soft Skills: Communication, Collaboration, Problem-solving, Attention to detail, Adaptability

REAL-WORLD PROJECTS (UI/UX)

Gunasho (e-Suchana) — UI/UX Contributor (Web + Mobile App) | Development Phase

- Contributed to the redesign of a digital grievance/complaint submission platform for local government users.
- Designed user flows and UI screens for key journeys (Login/Signup, Add Gunaso/complaint, Track status/updates) in Figma.
- Created mobile-first layouts and interaction prototypes to improve navigation clarity and accessibility.
- Collaborated with the development team by sharing specifications (component states, spacing, responsive behavior) for implementation.

BigAI Company Portfolio — UI/UX Designer (Website) | Development Phase

- Designed information architecture and page structure for a company portfolio site (Home, Services, Case Studies, About, Contact).
- Produced wireframes and high-fidelity UI in Figma with consistent typography, spacing, and reusable components.
- Prepared a developer-friendly handoff: responsive breakpoints, hover/active states, and component guidelines.

E-Library (Library Management System) — UI/UX Designer | Development Phase

- Designed end-to-end user flows for searching books, borrowing/returning, reservations, and user profile management.
- Created admin dashboards for catalog management, member management, and circulation workflows.
- Built interactive prototypes for review/testing and iterated designs based on feedback and evolving requirements.

HACKATHON EXPERIENCE & ACHIEVEMENTS

RelayHack x Tumlet — Game Project (1st Runner-up)

- Collaborated with a team to ideate, design, and present a game concept within hackathon time limits.
- Contributed UI/UX in Figma: user flows, screens, and an interactive prototype used for the demo.

RelayHack x Aqore — HR Management System (1st Runner-up)

- Helped design core HR workflows (employee records, approvals, and admin operations) with clear navigation.
- Created wireframes and high-fidelity UI in Figma and supported the final pitch/demo flow.

Additional Hackathon Participation (3rd Hackathon)

- Participated in a third hackathon; collaborated with a team to prototype a solution and present to judges.

PRACTICE UI/UX PROJECTS

Food Ordering Platform — Group UI/UX Project

Link: <https://www.figma.com/design/Zk8LqxH6GCROx7vgHNLclv/UIUX-advance-project?node-id=0-1&t=DaDSqyzBUYz6RXTD-1>

- Designed user flows, wireframes, and high-fidelity screens for browse, order, and checkout journeys.
- Created a clickable prototype and refined layout based on usability considerations.

AAC Bricks — Company Website UI/UX

Link: <https://www.figma.com/design/MkjBV1DBvF9ynoBkzNOjr3/AAC-Bricks?node-id=0-1&t=36Qx4bHNTK4RTGoi-1>

Developed information architecture and page structure for key website sections.

- Produced consistent UI components and improved visual hierarchy for readability.
